YESTech to Introduce New Benchtop AOI APEX Printed Circuit EXPO

New B2 Benchtop System Raises the Stakes in the AOI Cost-Performance Wars

San Clemente, CA – January 24, 2006 YESTech, a leading supplier of automated inspection and yield enhancement systems for the electronics industry, will introduce its new Benchtop automated optical inspection system for post-reflow pcb's at the APEX Printed Circuits Expo in Anaheim, Calif. from February 8-10, 2006, in **Booth 2178**.

"The new B2 Benchtop AOI offers faster throughput, improved board handling, and other enhancements to further improve the YESTech advantage in cost/performance and customer ROI," said Troy Johnson, YESTech's VP of sales. The B2 offers up to a three times improvement in inspection speed and improved fusion lighting to provide the highest defect coverage available by any Benchtop system. The B2 also features large board handling in a compact package, and complete software/board setup compatibility with the inline F1 series. We're very pleased to introduce the B2 as we carry on YESTech's commitment to continuous improvement for our customers," Johnson concluded.

Programming the B2 is fast and intuitive. Operators typically take less than 30 minutes to create a complete inspection program including solder joints. The B2 utilizes a stand package library to simplify training and ensure program portability across manufacturing lines. The newly available image processing technology integrates several techniques, including color, normalized correlation and rule-based algorithms to provide complete inspection coverage with an extremely low false failure rate.

The B2 sells for \$42,000 with delivery of less than two weeks.

Editor's Note

A high-resolution image of the B2 Benchtop AOI product is available by calling (949) 361-2714 or by visiting <http://www.kreativesolution.com/yestechb2.htm>.

About YESTech

Headquartered in San Clemente California, YESTech is a leading provider of automated optical and high-resolution x-ray inspection systems, with integrated yield enhancement solutions for the printed circuit board assembly and advanced semiconductor-packaging industries. Founded and managed by experienced industry experts compounded with a history of success, YESTech brings powerful and cost-effective inspection and yield enhancement solutions to the electronics market. The company has sales offices and customer support centers in North America, Asia and Europe. For more information on YESTech and its products, visit www.yestechinc.com.
