**YESTech Introduces New M1™ AOI System at Nepcon China**

**San Clemente, CA – March 20, 2006** – YESTech, a leading supplier of automated inspection and yield enhancement systems for the electronics industry, announces the introduction of the new M1™ AOI system, developed with enhancements to satisfy the demanding high-volume manufacturing environments in the Asian market. The M1, with a smaller footprint and board handling system, is designed for maximum flexibility and can instantly adapt to pre- or post-reflow inspection and a multitude of rework and data tracking scenarios.

Based on YESTech's proprietary machine vision software, the new M1 AOI System provides class-leading performance with its extremely fast and easy program creation. Innovative and powerful inspection algorithms easily identify all visible component, lead, and solder anomalies. YESTech's advanced three mega pixel Thin Camera™ and new Fusion Lighting™ enable the exceptional defect coverage and extremely low false call rate that is necessary to reduce costs, improve quality and increase throughput of today's manufacturing process.

**Page 2 of 2**

“By combining award-winning technology with years of industry experience, YESTech is able to offer the new M1 at a very low price to ensure our unending commitment to offer the best value in AOI,” said Josh Petras, YESTech’s International Sales Manager. “Opening our branch office last year in China was very strategic for YESTech. The new M1 AOI system allows us to diversify our product lineup and accelerate our growth into the international market.”

The M1 AOI System is priced from \$82,500. Delivery time is two to four weeks. Additional product information is available immediately by calling the Shanghai China Sales and Support Center at: 0086 21 54257689; YESTech’s USA HQ at: 949-361-2714 or visit the YESTech Website @ [www.yestechinc.com](http://www.yestechinc.com).
