### **YESTech Showcases New F1™ AOI System and YESPC Software at 2006 Nepcon East on May 10-11 in Boston, MA - in Booth 2033**

**San Clemente, CA – May 9 , 2006** YESTech, a leading supplier of automated inspection and yield enhancement systems for the electronics industry, is introducing the latest synergies of its two benchmark products - YESPC Software and F1™ AOI system - at the 2006 Nepcon East Conference in **Booth 2033** in Boston, MA.

The YESTech YTV F1-Series AOI system offers high-volume manufacturing environment enhancements that deliver unsurpassed automated PCB inspection and reduced costs, improved quality and increased throughput. Because it is faster and more intuitive, the F1-Series AOI off-line programming maximizes machine utilization with real-time SPC monitoring that provides a valuable yield enhancement solution, easily configurable and portable across multiple manufacturing lines.

As an enhancement to the already powerful capabilities of YESTech's AOI technology, YESPC software enables senior management to make informed decisions by providing diagnostic and trending analysis of the manufacturing process, which saves them time and money. By providing real-time monitoring and reporting of SMT production processes, management can immediately react to critical process events. And, YESPC software is fully compatible with every YESTech AOI and YTX-5000 combined x-ray/vision system.

“YESPC and the F1-Series AOI each combines award-winning technology with years of industry experience, to offer the best value in AOI solutions,” said YESTech president Don Miller. “Throughout the Conference, YESTech will be demonstrating the new YESPC software features and functionality, as well as the latest enhancement of the F1 AOI system.”

For pricing on the F1-Series AOI System and YESPC Software call YESTech's USA HQ at: 949-361-2714 or visit the YESTech Website @ [www.yestechinc.com](http://www.yestechinc.com).

#### **Editor's Note**
