AIC Releases XD200 FC/SAS/SATA RBOD Desktop RAID Subsystem at SNW Fall 2008

Demonstrations of complete line of storage solutions and high performance and high versatility FC/SAS/SATA desktop RAID subsystem will be held in booth #1809 on October 13-16th

City of Industry, CA – October 10, 2008 – Advanced Industrial Computer (AIC), an industry leading provider of OEM/ODM server and storage solutions, will introduce the new XD200 RBOD desktop RAID subsystem as well as hold demonstrations of their latest storage solutions at this year's Storage Networking World, held in Grapevine, Texas, booth # 1809 on October 13-16, 2008. AIC's total solution concept provides users with a broad range of solutions to meet their unique demands.

AIC will be showcasing its newest innovation, the next generation XD200 RBOD. This highly versatile desktop RAID subsystem brings users a powerful storage solution for the most demanding applications. The XD200 offers three storage interface options, 4G Fibre Channel, 3G SAS and SATA technologies, in one, small desktop footprint. Unlike conventional solutions that use eSATA or USB connections, the XD200 offers a 12Gbps wide SAS bandwidth host and an expansion interface that supports both SAS and SATA drives. The XD200 excels in speed as well, quadrupling standard data transfer rates of conventional desktop SATA RAID subsystems. This highly versatile system can also be configured with dual 4G Fibre Channel host interface with 8Gbps bandwidth as well as enable users to manage storage through AIC's Extreme Storage Manager. Extreme Storage Manager is a user-friendly web-based Storage Management GUI that puts remote management and system administration at a user's fingertips. The XD200 is available in a 5-bay and 10-bay configuration for users unique storage needs, and is highly expandable for additional storage, through its expansion ports.

"Whether running transaction-intensive storage workloads or those that require the highest capacities, the Seagate® Cheetah® 15K.6 and Barracuda® ES.2 families of SAS drives are field-proven storage solutions that are ideal for use with AIC's new subsystems," said Henry Fabian, Executive Director of Enterprise Product Marketing at Seagate Technology LLC. "By leveraging the SAS interface option, AIC's customers will enjoy seamless integration as well as increased performance and flexibility for Tier 1 and 2 enterprise environments."

In addition to the XD200 RBOD, AIC will feature its latest technology innovations, ideally suited to meet the needs of a variety of applications. AIC's complete line of storage and server solutions offers users a one-stop resource for flexible, reliable, scalable solutions. In the booth, they will conduct static demonstrations of G-series green SAS/SATA storage server chassis, XJ1100 SAS/SATA JBOD subsystem, the latest SBB 2.0 controller, and MAX I/O™ based 3U 16-bay barebone system. MAX I/O technology allows for the use of any off-the-shelf cards, such as RAID controllers and HBAs, video cards, NIC cards, video capture cards or any other PCI, PCI-X or PCIe cards.

"We are pleased to be introducing our latest high performance, high versatility FC/SAS/SATA desktop RAID solution at this years SNW show", said Gene Lee, Vice President of Advanced Industrial Computer, Inc. (AIC). "The XD200 RBOD offers users the ideal solution for high demand storage applications. We are anxious to bring this innovative new product to the market and excited to do so at this show."

Editor's Note

High-resolution photos of the AIC products featured at the show are available by calling (949) 439-5351 or by visiting http://www.kreativesolution.com/aic_SNW08_PR.htm For more information on availability and pricing on these and other AIC products, please call (626) 581-4300 or visit the website at: <http://www.aicipc.com>.

About Storage Networking World

Storage Networking World - the world's largest and foremost storage networking event - is where IT management and professionals learn, network and maximize their company's storage capabilities. At SNW, you can choose from over 140 educational sessions and network with peers from around the globe-plus visit with top solutions providers in the world's largest Expo focused on storage. SNW's vast agenda makes it the most appealing and well-respected assembly of storage networking professionals in the world. For more information go to <http://www.snwusa.com>

About Advanced Industrial Computer, Inc (AIC)

AIC is a leading provider of OEM/ODM server and storage solutions, ideally developed to meet the unique demands of a wide variety of markets. With expertise in in-house design, validation, manufacturing and production, our expansive selection of products are highly flexible and can be configured to any form factor or custom configuration. AIC leads the industry in all categories, with over 100 years of combined experience in mechanical, electronic, system-level engineering as well as a dedication to product innovation and customer support. Headquartered in City of Industry, California, AIC has offices and operations throughout the United States, Asia and Europe. For more information on Advanced Industrial Computer, Inc. (AIC) and its products, please call (626) 581-4300 or visit our website: <http://www.aicipc.com>.
