## YESTech Ships Multiple F1 AOI Inspection Systems to Comtech EF Data

**San Clemente, CA – June 21, 2007** – YESTech Inc., the innovative provider of Automated Optical and X-Ray Inspection Systems, today announced the shipment of multiple F1 Series AOI systems to Comtech EF Data in Tempe, Arizona, a market leader in satellite communications products for both commercial and government applications.

Comtech EF Data's high reliability products present a constant challenge to traditional inspection and quality assurance practices. Comtech was in need of newer automated inspection solutions to replace several outdated AOI systems that were ineffective and overly complicated to operate. YESTech was able to work with Comtech to fulfill their demanding inspection needs, while providing a system that was fast and easy to use. "We are very pleased with the performance and return on investment that our YESTech systems have provided. Our decision to purchase the YESTech F1 AOI was easy based on and our confidence in the people at YESTech and their ability to support our needs," said DucAhn Trinh, Comtech's Manager of Advanced Engineering.

"Our commitment to invest in newer inspection and yield improvement tools is key to advancing our technology to meet our customers' demands. After struggling with our old AOI's, it was very satisfying to discover YESTech's F1. The use of the YESTech systems has helped make dramatic improvement in our inspection capabilities. Their implementation was seamless and has actually reduced the demand on our engineers assigned to the area, allowing them to become more effective assets to our organization" commented Theo King, Comtech's AOI Manager.

Don Miller, President of YESTech Inc., said "We appreciate Comtech EF Data's decision to implement our F1 Series AOI systems. Partnering with YESTech to upgrade their inspection capabilities is a strong endorsement for our capabilities in a demanding high reliability environment."

### Editor's Note
