## YESTech Announces New X1 Automated X-Ray Inspection System

*The X1 leverages latest image processing technology providing a superior inspection solution with a remarkably quick return on investment.*

**San Clemente, CA – February 14, 2007** – YESTech, an innovative provider of yield enhancement solutions for the electronics industry, announced today the introduction of its X1 automated x-ray inspection (AXI) system.

This versatile system offers electronic manufacturers and semiconductor packagers advanced inspection capability of solder joints and critical hidden features. The x-ray images of solder joints are automatically analyzed to detect structural defects such as insufficient solder, voiding, shorts, and opens that typically account for up to 90% of the total defects on a complicated board.

Programming of the X1 is fast and intuitive, with a typical complete inspection program being created by operators in less than 30 minutes. By utilizing a standard package library to simplify training and insure program portability across varied manufacturing lines, the X1 offers high defect detection, fast throughput and ultra low false calls. YESTech's remote programming maximizes system utilization and the real-time SPC software that is provided with the system provides a valuable yield enhancement solution.

Don Miller, YESTech President, states, "For electronics manufacturers, Automated X-ray Inspection (AXI) is becoming increasingly popular because, like its counterpart, Automated Optical Inspection (AOI), AXI offers a cost effective, non-invasive inspection solution for today's complicated assemblies. The YESTech X1 now brings this important capability to market with the fastest return on investment available."

### Pricing and Availability

The X1 is available for immediate delivery. For more information call (949) 361-2714 or email us at: [sales@yestechinc.com](mailto:sales@yestechinc.com)

### Editor's Note

A high-resolution image of the X1 is available by calling (949) 715-2155 or by visiting <http://www.kreativesolution.com/yestechytx1.htm>

### About YESTech

Headquartered in San Clemente, California, YESTech is a leading provider of automated optical and high-resolution x-ray inspection systems, with integrated yield enhancement solutions for the printed circuit board assembly and advanced semiconductor-packaging industries. Founded and managed by experienced industry experts compounded with a history of success, YESTech brings powerful and cost-effective inspection and yield enhancement solutions to the electronics market. The company has sales offices and customer support centers in North America, Asia and Europe. For more information on YESTech and its products, visit [www.yestechinc.com](http://www.yestechinc.com)
